Dear Readers,

Staying positive and being flexible shall be the key in dealing with the current unprecedented situations. The pandemic has impacted our professional and personal life to an extent that has never been thought of in our lifetime. Being flexible also improves our ability to adapt to change and situational demands as you have been seeing several of our decisions being revised in recent times for improved productivity. Observing the guidelines in dealing with Covid situation without compromise is the only way out especially at our workplaces to tide over the current crisis. I am sure the staff and students of our University are well trained and sensitive not only in guarding themselves but also in creating awareness in the community by being good examples; the same has been discussed at our 40th University Officers meeting held on virtual mode this month.

The University is committed to progressive measures despite limitations. The Research Council and Extension Education Council meetings were held to review our functioning and set priorities for the year ahead. The outputs from these meetings are quite satisfactory and our faculty staff are making steady progress despite Covid restrictions in the last year. The Scientific Workers Conference was also held at the University involving key officials of the State Fisheries Department after a gap of five years, which focussed more on research needs of the fisheries sector in the State. The support rendered by the Commissioner of Fisheries Th. J. Jayakanthan, IAS is the major reason for the success of the conference.

At a time when we celebrated International Women's day at all our campuses, feel happy to reiterate that our University is gender-sensitive and has an efficient women force constituting a little over 33% of our faculty strength and gradually improving to reach equality like that of our girl students' strength which is almost equal to that of boys. Special programmes were conducted on the occasion of World Water Day at our campuses. The College of Fisheries Engineering on its part organized an online training on Scientific Writing, a very useful programme to benefit young researchers. Two-day training on Effective Teaching Skills was successfully organized for the young Assistant Professors of our University with the initiative of DEE utilizing ICAR Development Grants. Fisheries College and Research Institute, Thoothukudi celebrated the World Taxonomist Appreciation Day through special lectures by our former deans and fishery biologists, Dr. V.K. Venkataramani and Dr. K. Venkataramanujam. The Voters' awareness campaign organized by our students was well received and widely covered by the print media. I do urge all constituent units to plan for more online programmes to keep us well connected.

Dr. G. Sugumar, Ph.D.,
Vice-Chancellor
